Base search service for locating publications in HSE university collection

The screenshot displays the HSE Library website interface. On the left is a vertical navigation menu with items: Registration, Electronic Resources and Remote Access, Support and training, HSE Library eCatalog, Library Lending Departments, Documents, Book Purchases, Digital Delivery Service, Visitors Frequently Asked Questions, Ask us a question, Contacts (with Facebook, Instagram, and VK icons), and Central Library (with address: Pokrovsky boulevard, 11, building N (metro stations "Chistie Prudy", "Turgenevskaya", "Kilay-Sa. St.", "Kuvshinskaya", "Chkalovskaya"), entrance from the 2nd and the 4th floor of the building N). The main content area is titled "HSE Library" and features several service tiles: "Online registration" (with a person using a smartphone), "Online registration for borrowing printed study books" (with a person holding books), "HSE Library eCatalog" (with a stack of books), "Electronic Resources and Remote Access" (with a person using a laptop), "Publication Finder" (with a person using a tablet), and "EBSCO Discovery Service" (with a person using a laptop). A "News" section on the right contains three items: "New trials provided by Russian Foundation for Basic Research as part of the national subscription selection:" (dated 15 October 2020), "Cleaning day at the Library on October 2, 2020" (dated 28 September 2020), and "We invite you to join our electronic resources workshops" (dated 24 September 2020). A red dashed box highlights the "Publication Finder" tile and the "Central Library" contact information in the menu. A red arrow points from the text "Base search service for locating publications in HSE university collection" to the "Publication Finder" tile.

Searching: Library Publications

The screenshot shows a search bar with the text "Science" entered. A red arrow points to the text. To the right of the search bar is a green button labeled "Поиск" (Search) and a blue question mark icon. Below the search bar is a dropdown menu listing several search results:

- Science News
- Christian Science Monitor
- Science
- Popular Science
- Science of The Total Environment
- Proceedings of the National Academy of Sciences of the United States of America (PNAS)
- Scandinavian Journal of Caring Sciences
- Administrative Science Quarterly
- Science World
- Social Science Quarterly

- Titles containing you search terms appear as you type.
- When your desired title appears in the list simply click it to run the search.

EDITORIAL

Systemic equity in education

Too often in higher education, the legacy of laws, policies, and practices that have systematically denied educational opportunities to Blacks is ignored, thereby perpetuating racial inequities. In the United States, higher education is a key route to career success and upward socioeconomic mobility. Unfortunately, this path is increasingly becoming most accessible to privileged communities. As the new president of Olin College of Engineering in Massachusetts, and as a woman of color, I am in a position to help unburden higher education from systemic racism and promote positive change that extends beyond academic boundaries.

My parents instilled in me the importance of education for personal and familial uplifting as well as a means to obtain advanced degrees. Until *Brown*, most college-educated Blacks graduated from HBCUs. I eventually became the first Black student to get a doctorate in chemical engineering from Rice University; the fifth woman in the nation to obtain that degree; and the first Black woman in the country to hold a tenure-track position in chemical engineering. But it is discouraging that the challenges that existed along my journey remain challenges faced today by Black students interested in pursuing careers in science, technology, engineering, and mathematics. There is still a lack of diversity among faculty and students in engineering schools. This environment has negative consequences and feeds a vicious cycle. The dearth of Black faculty role models and mentors contributes to the underrepresentation of Black students. Structural and social barriers such as hostile climates, bias, and tokenism make it difficult to achieve a sense of belonging and limit career choices and opportunities for Black students and faculty, further perpetuating the persistent underrepresentation. Today, 3.9% of students in the United States who graduate with a bachelor's degree in engineering are Black. And only 4.1% of students who graduate with a Ph.D. in engineering

“It’s time to abandon the myth that students and faculty”

Gilda A. Barabino is the president of Olin College of Engineering, Needham, MA, USA. gbarabino@olin.edu
