A red arrow points from the first search result to a preview window on the right. The preview window shows the title 'Novel Cassette-Based Shuttle Vector System for Gram-Positive Bacteria' by Emmanuelle Charpentier, Ana I. Anton, Peter Barry, Berenice Alfonso, Yuan Fang, and Richard P. Novick*. The abstract discusses the development of novel versatile *Escherichia coli*-staphylococcal shuttle vectors based on PCR-generated interchangeable cassettes.

Composition and evolution of oligomeric proanthocyanidin-malvidin glycoside adducts in commercial red wines (Article)

Краткое описание [Просмотр пристатейных ссылок \(35\)](#)

Studies regarding composition and evolution of oligomeric proanthocyanidin-anthocyanin adducts in red wines have often focused only on a limited number of small dimers. Now, a group-specific liquid chromatography-tandem mass spectrometry method was utilized to measure two-dimensional (2D) chromatographic fingerprints of three different types of oligomeric adducts in commercial red wines. A new protocol was developed to visualize and summarize the chromatographic data. The 2D fingerprints showed how the compositions of the oligomeric adducts had typically only minor differences between wine varieties in young wines, excluding the Pinot Noir wines. Major quantitative differences were found between the wine varieties despite the lack of major compositional differences. The evolution of the concentrations differed between the three structural sub-groups, while similar general patterns were observed in the compositional evolution. Via statistical modelling, several characteristics in the polyphenolic starting material composition were tentatively suggested to affect the formation of the oligomeric adducts. © 2020 Elsevier Ltd

**Integrity or Openness? Reassessing the History of the
CJEU's Human Rights Jurisprudence†**

This Symposium highlights the different comparative law methods used by the contributors and at the same time reveals a common theme, namely the difficult tension facing the Court of Justice of the European Union (CJEU) in maintaining the integrity and exclusivity of EU law in a unique supranational system, while simultaneously maintaining an openness to the legal traditions of its constituent states and other judicial systems. This emerges in the Court's views on one particular foreign source of law: the European Convention on Human Rights (ECHR). Starting in the 1970s, the CJEU began imagining the basic set of fundamental rights that could be found both in the general principles of the original treaties and in the constitutional traditions of the member states. When the Court began

x Introduction

Introduction: The Global Financial System and the Problems of Regulation

This book examines the principles, policy, and law relating to the regulation of international banking. Other regulation textbooks focus on the laws and regulations of one particular country, be it the United States or Britain or some other important banking center. This approach is understandable, since regulations have traditionally been made and applied at the national level. Nonetheless, during the past 30 years, financial systems, markets, and institutions turned global. Each of the leading international banks now operates in dozens of countries and is therefore subject to oversight by dozens of regulatory agencies. Nationally based regulators, in the most developed and in developing countries, have adapted to the new realities of the global financial system through new forms of cooperation and coordination, with international standard-setting bodies forming the core of this response. We believe these developments are fundamental to the understanding and teaching of bank regulation.

Although the government agencies responsible for regulating global markets and institutions remain rooted in national legal systems, they have increasingly sought convergence of their rules and regulations. European Union countries have agreed on common minimum standards and oblige their national regulators (through international treaty) with implementation. In the rest of the world, convergence on minimum standards centers on *soft law*, with informal international groupings of regulators seeking compliance with their standards through force of example and other forms of moral suasion. The most important such group is the Basel Committee on Banking Supervision (Basel Committee or BCBS), a body that brings together central banks and regulatory agencies from North and South

Do Debt Contract Enforcement Costs Affect Financing and Asset Structure?

Radhakrishnan Gopalan
Washington University in St. Louis

Abhiroop Mukherjee
Hong Kong University of Science and Technology

Manpreet Singh
Georgia Institute of Technology

Using the staggered introduction of fast-track debt recovery courts in India, we estimate the causal effect of a reduction in debt contract enforcement costs on financing and asset maturity. A reduction in enforcement costs is associated with an increase in long-term debt and a decrease in short-term debt and trade credit. The increase in debt maturity is confined to firms that borrow from multiple lenders, have abnormally short debt maturity structures before the reform, and to smaller firms. Firms also reduce the number of banking relationships, and increase the proportion of long-term assets after the reform. (JEL F34, G32, G33, G38, K42)

Received June 12, 2014; accepted September 17, 2015 by Editor Andrew Karolyi.

The globalization of financial markets has led to considerable interest in understanding how difficulties in financial contract enforcement affect firm financing. Lenders in many countries have to incur costs to enforce their contracts, and these costs can reduce the amount they recover when firms default. This, in turn, is likely to increase the cost of external debt finance, and, in extreme cases, can even lead to a complete breakdown of the market

Introduction

Antony Allott and Gordon R. Woodman

The papers in this volume were presented at the first conference of the Commission on Folk Law and Legal Pluralism at Bellagio, Como, Italy, from 21st to 25th September 1981.

Folk Law and Legal Pluralism as a Field of Study

The first steps in the establishment of a new field of enquiry comprise the delimitation of the field and the attribution of a name to it. The two operations are part of a single act. It is not by chance that Genesis records that one of the first activities of the first man was to name every beast. The first step in connection with the field covered by the present volume was taken when the Commission on Folk Law and Legal Pluralism was set up through a Dutch initiative. As the list of our present authors discloses, the range of the Commission is now worldwide; but just as strikingly the subjects which they have chosen to discuss are spread as widely in kind and orientation. Is this a case where the field is so wide (one thinks of "Comparative Law", which has become almost a synonym for "Law, preferably foreign") as to cease to have relevance; or can one truthfully say that the world of legal and social science must now take in and work from a new map, linking institutions and processes formerly conceived of as distinct?

It was naturally the hope of the organizers of the Bellagio conference, as it is of the editors of the present volume, that the latter alternative was the more correct. That is, E.M. Forster's plea, "Only connect!", must now serve to link studies and researchers in areas previously far apart. Two worlds meet in the papers which follow: on the one hand, the world of "primitive" or customary laws - of the laws of peoples who use neither writing nor codified or recorded laws, and who, in parallel, probably lack modern technologies

The authors are "Deepa Sethi" and "Vikas Arya". The journal title is "International Journal of Law and Management". The page number is "417". The abstract is: "Purpose - The purpose of this study is to determine the existing legal implications for medical negligence in India and recommending how open communication and empathy by the doctors can help prevent these implications. Design/methodology/approach - This research is based on a qualitative method. Indian laws, Indian constitution, journal articles, books and other writings have been reviewed to develop this study. Findings - There are many legal implications for medical negligence in India, and justice can be demanded under a number of Indian laws. This study also found that it is important to create awareness regarding the laws governing medical negligence through effective communication and empathy. Originality/value - Extant literature discusses in detail the various laws related to medical negligence and few talk about creating awareness about these laws amongst people, and while some researchers understand the importance of sensitizing health professionals of the nitty-gritty of the legal implication governing medical negligence, none provides a framework of medical negligence with the help of sensitizing health professionals through communication. This study fills the gap by focusing on prevention than cure. Keywords Medical negligence, India, Legal implications, Communication, Empathy. Paper type Research paper." The introduction starts with "Medical profession is a noble profession. When in pain, injury or illness, the patients depend largely on the line of treatment adopted by the doctors. Trust and ethics are the basis of this relationship between the patients and the doctors. Hippocrates, the ancient Greek physician, prescribed the ethical behavior of doctors. Rules and regulations related to medical practice have also been laid down. With the commercialization of the medical profession, expectations of patients have increased and so has medical negligence, which the doctors might owe to the paucity of time and human resources. However, this has also resulted in the number of medical negligence legal suits against doctors and hospitals. It is therefore necessary to probe into the topic of negligence and the need of the awareness of the legal implications governing it." There is a small logo in the bottom right corner.

Introduction

We clearly have a pretty good market share in Europe, so we might have some small acquisitions of some brands in some countries, but the growth will be limited" said Mr. Claudon, the General Manager of Greenfields Group at a management team meeting hold in a conference room next to his office in the company premises in Roubaix on the 9th of March 2019. "The growth for Greenfields will come from the non-Europe zone. Our company reported this week its annual financial results for 2018, a year of rising sales and earnings and in which we have accomplished a major acquisition - that of the agro-industrial and commercial assets of Tovich Conservi in Russia - We are ready for more mergers and acquisitions. That's what we did in the past and that's what we have in mind for the future he added.

Company background

Greenfields is a French company producing processed vegetables. Founded in 1970 by Louis Chandon, and started as a small canned vegetable company producing mushrooms, followed by washing, cutting and packing of vegetables. This period saw the first contacts with large supermarkets, setting a pattern that has been followed ever since.

Located in the north of France, the company's activities include the production and trade of a wide and diverse range of preserved fruit, vegetables and mushrooms, along with ready-made products such as soups, sauces and pasta dishes. Greenfields Group combines high technology equipment and facilities, specialized and perfectly trained personnel and high quality products.

The company currently provides 100 countries with fruits and vegetables preserved using natural processes, in accordance with the fundamental values that have underpinned the company's creation and growth. Greenfields holds leading positions in the processed vegetable market in Europe and elsewhere. The company's fruit and vegetable business is

Abstract

In this article we examine the rate at which patent applications are granted as a function of the inventor's race and gender. Empirical analysis of more than 3.9 million U.S. applications finds minority and women applicants are significantly less likely to secure a patent relative to the balance of inventors. Further analysis indicates that a portion of this bias is introduced during prosecution at the Patent Office, independent of the quality of the application. Mechanisms underlying these disparities are explored. The article concludes with a discussion of our results and their interaction with patent law, innovation policy, and employment trends.

Measuring the socio-economic impact of forced evictions and illegal demolition; A comparative study between displaced and existing informal settlements

ABSTRACT
Slum formation and settlements globally are an indication of either a housing deficit or the relative un-affordability of formal housing. Across developing nations it is quite common to find the urban poor resolving their accommodation issues by moving to slums while the government more often seeks to oppose the formation and continued existence of such settlements. Government interventions consequently further exposes the informal dwellers of these settlements into extreme vulnerabilities. A significant number of slum settlers are gainfully employed engage across various in informal economic activities and tend to be major drivers of informal economies. In this study, we investigate the impact of forced evictions from a socio-economic perspective by comparing former income earning households of a demolished slum to households in three existing slum communities. As well as investigating the dominant factors prompting slum formations and settlements in two of the three communities which are emerging communities. Primarily, our focus was to map household income and ascertain fatalities post-eviction. Secondly, we intend to profile the households in emerging communities to ascertain factors prompting slum formation and settlements in Lagos, Nigeria. We conclude that evictions are both a cause and consequence of poverty which in itself is a contributing factor to slum proliferation. We outline a few interventions in cases of unavoidable demolition and suggest the need to domesticate International Treaties in the protection of informal dwellers among other things.

Abstract This chapter outlines the framework of the research presented in this volume. It starts with a notion that national criminal policies on illicit tobacco trade are a part of the national tobacco control policy, and at the same time a part of a general national criminal policy and points to the need for an in-depth research of national criminal laws in this regard. It presents the scope of the research, which consists in a comparative analysis about the illicit tobacco trade and about efforts to counteract that trade in six EU Member States—four post-communist states (Lithuania, Poland, Slovakia and Romania), on the Eastern border of the Union and two “old” EU Member States (Germany, Italy).

The Cambridge Law Journal publishes articles on all aspects of law. Special emphasis is placed on contemporary developments, but the journal's range includes jurisprudence and legal history. An important feature of the journal is the Case and Comment section, in which members of the Cambridge Law Faculty and other distinguished contributors analyse recent judicial decisions, new legislation and current law reform proposals. The articles and case notes are designed to have the widest appeal to those interested in the law - whether as practitioners, students, teachers, judges or administrators - and to provide an opportunity for them to keep abreast of new ideas and the progress of legal reform. Each issue also contains an extensive section of book reviews.

Please note: All submissions to the Cambridge Law Journal should go through <https://mc.manuscriptcentral.com/tclj>.

Anyone contacted by University Press Journals, Association of British University Presses and International Agency for Development of Culture, Education and Science (IADCES) claiming that they offer publication in CLJ should be aware that we do not work with these companies.

The third book is 'Organizing Matters: Two Logics of Trade Union Representation' from the ILERA Publication series, published on 29 May 2020. Each book entry includes a cover image, title, subtitle, author/editor, and publication details.

The image shows the cover page of the 'INTERNATIONAL CENTRE FOR SETTLEMENT OF INVESTMENT DISPUTES' Convention. The page is numbered '1' at the top. The title is centered. Below the title, it reads 'SECTION 1 ESTABLISHMENT AND ORGANIZATION' and 'ARTICLE 1'. The author is 'CATHERINE KETTLEWELL'. The main text of Article 1 consists of two numbered paragraphs: '1. There is hereby established the International Centre for Settlement of Investment Disputes (hereinafter called the Centre). 2. The purpose of the Centre shall be to provide facilities for conciliation and arbitration of investment disputes between Contracting States and nationals of other Contracting States in accordance with the provisions of this Convention.' Below this, it says '1. COMMENTARY' and '1.01 Chapter 1 of the Convention sets the basis of the formation and organization of the Centre from the creation of a separate legal personality to the organic structure and functioning of its governing body.' At the bottom, it reads 'A. Establishment of the Centre'.

A Dictionary of Law (9 ed.)

Edited by Jonathan Law

Previous Edition (8 ed.)

Over 4,800 entries

This bestselling dictionary is an authoritative and comprehensive source of jargon-free legal information. Its entries clearly define the major terms, concepts, processes, and organization of the English legal system.

Now in its ninth edition, this A-Z has been fully updated to incorporate the latest legislation, such as The Modern Slavery Act 2015, the EU referendum, and changes in consumer, immigration, and family law. Over 100 new entries have been added, including entries such as Article 50, Brexit, and the Consumer Rights Act 2016. In addition, there is a useful Writing a ... [More](#)
