Dear colleagues!

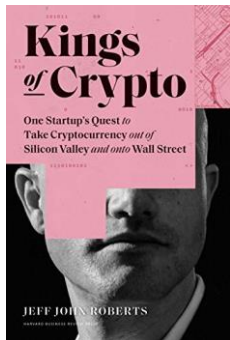

We are happy to announce that we will be developing our e-book collection through **demand-driven acquisition** or **DDA**.

DDA benefits both our patrons and the Library itself. Patrons can access a much wider selection of e-books, and the Library only has to purchase the materials that are clearly being used.

Through DDA, we now have additional 200,000+ e-books from EBSCO eBooks collection available on EBSCOhost platform. You can find them using Publication Finder and EBSCO Discovery Service. Both tools are listed on the main page of our [website](#).

[Here](#) you can look through the comprehensive list of all e-books. The topics they cover vary from medicine, chemistry, engineering and mathematics to architecture, history of Arabic and African countries, urban studies, social sciences, literary studies and philosophy. You may utilize different filters, e.g. the publication date or a certain topic. The required password is **2021Libdigest***

Later in 2021, we will analyze the demand for all e-books in this list and will purchase those that our patrons want and use. Check out a few books that are currently available to our patrons below!
