ЭЛЕКТРОННЫЕ РЕСУРСЫ БИБЛИОТЕКИ НИУ ВШЭ

Понятие

Электронные информационные ресурсы — системы, реализующие унифицированный подход к производству, хранению и организации разнообразной информации с целью поиска, анализа и доступа к ней с использованием глобальных компьютерных сетей.

ЭЛЕКТРОННЫЕ РЕСУРСЫ БИБЛИОТЕКИ НИУ ВШЭ

Специфика академических электронных ресурсов

- Неанонимность.
- Структурированность.
- Постоянство (долговременность хранения).
- Оперативная и полная индексация, с возможностью полнотекстового поиска по всему информационному массиву.

Читайте подробнее: Alexander J. Gates, Qing Ke (2019). Nature's reach: narrow work has broad impact. Nature 575, 32-34 (2019).

<https://doi.org/10.1038/d41586-019-03308-7>

ЭЛЕКТРОННЫЕ РЕСУРСЫ БИБЛИОТЕКИ НИУ ВШЭ

Количество доступных по подписке платформ электронных ресурсов, ед.

Электронная подписка в разрезе национальных платформ

■ Ведущие платформы зарубежных ресурсов ■ Российские ресурсы

Составляющие электронной подписки Библиотеки

- Полнотекстовые зарубежные базы данных
- Полнотекстовые отечественные базы данных
- Реферативные базы и базы данных цитирования
- Специализированные базы данных
- Энциклопедии, словари и справочники
- Инструменты для работы с подпиской как единым информационным массивом

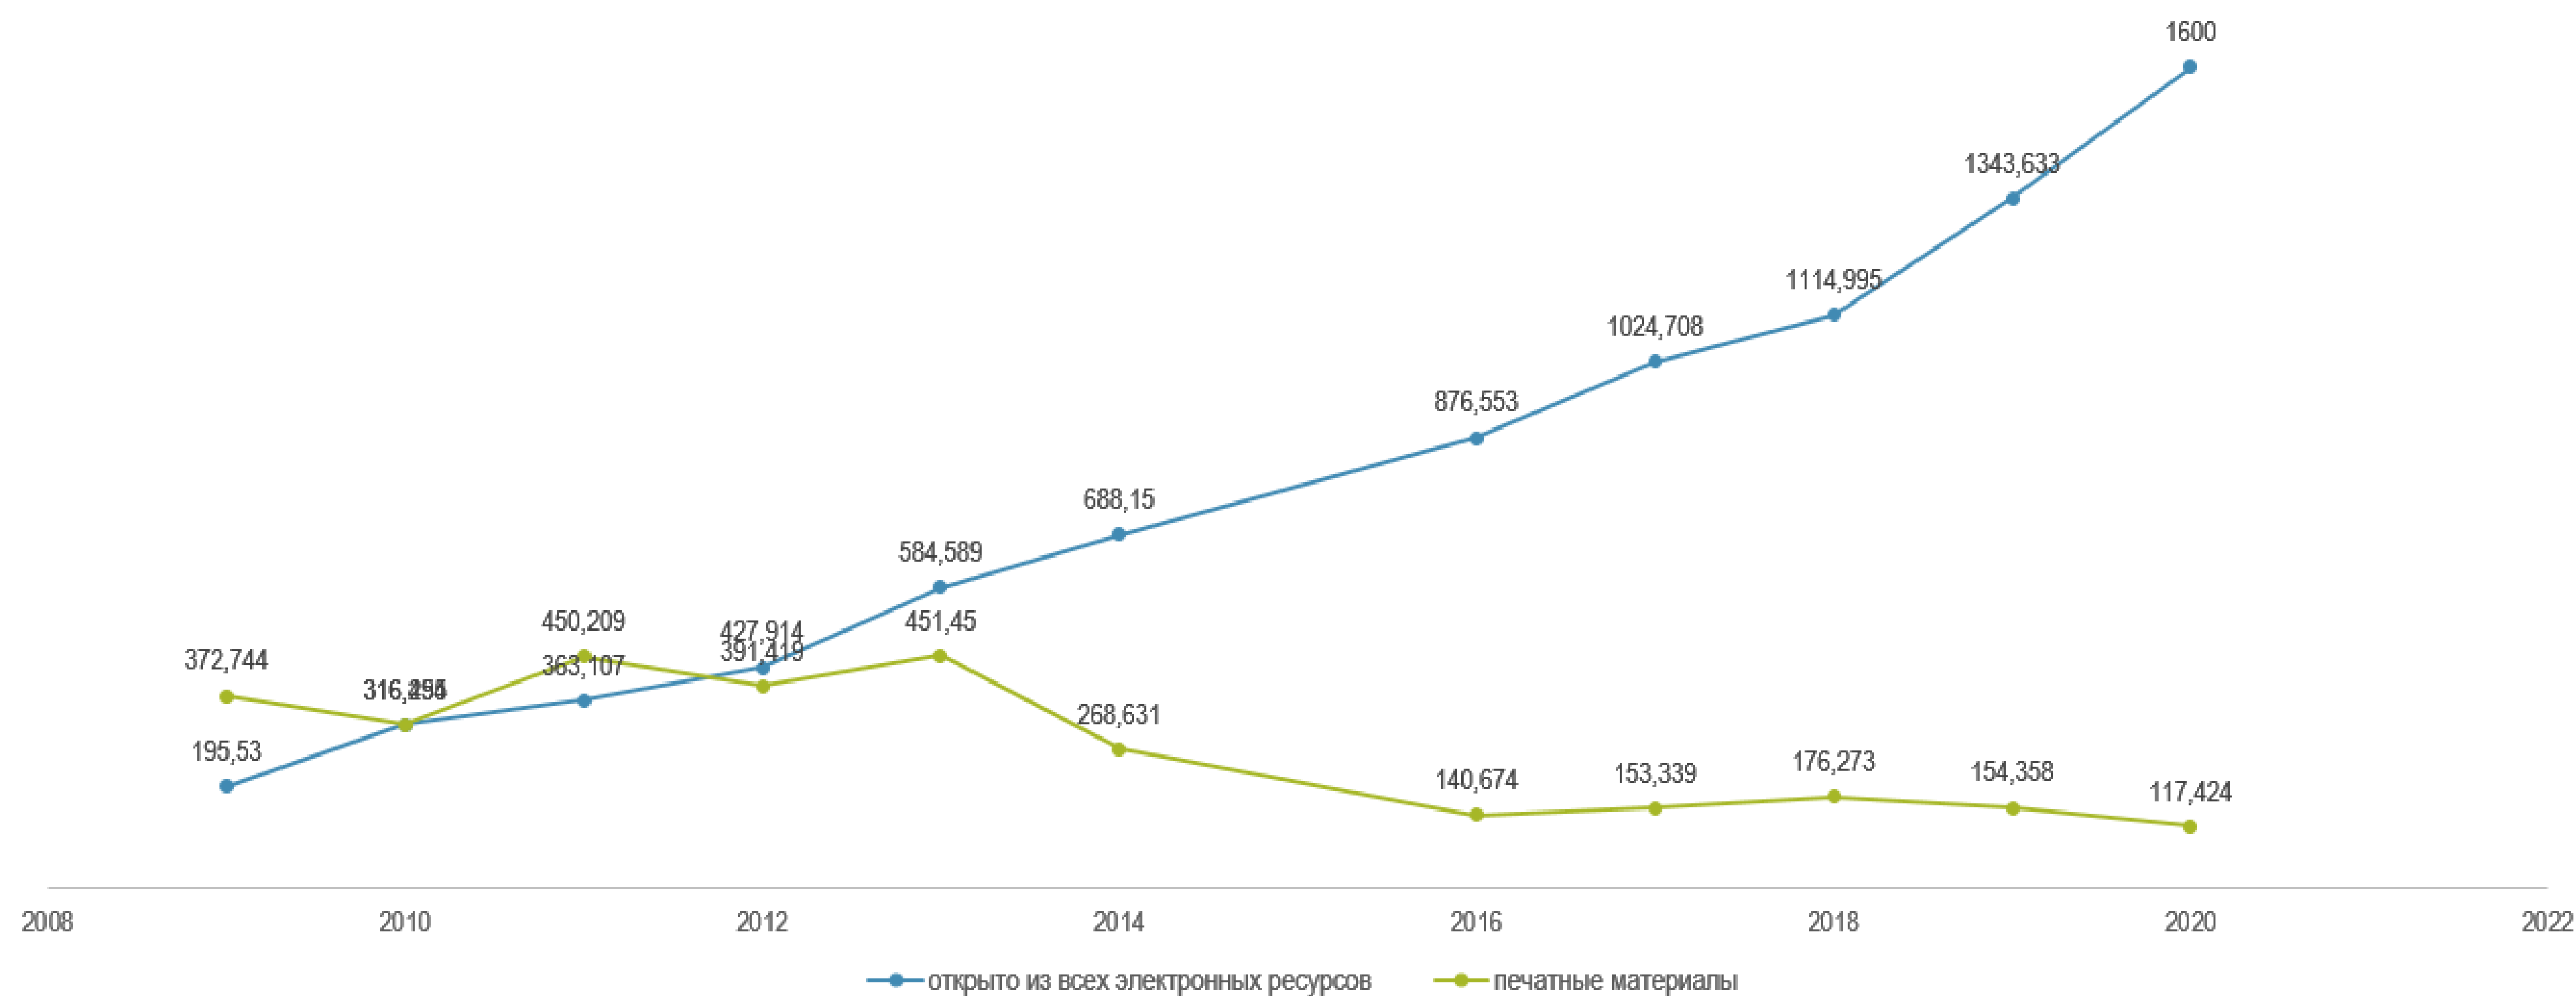

Подписка соответствует и превосходит мировые стандарты, есть ресурсы, которых нет в Гарвардском университете.

Абсолютно все ресурсы доступны во всех региональных кампусах ВШЭ.

Все объединены единым поисковым интерфейсом — «дискавери-системой».

Introduction: On the Role of Treaties in the Development of International Law

Treaties form the basis of modern international law. They serve to satisfy a fundamental need of States to regulate by consent issues of common concern, and thus to bring stability into their mutual relations. As an instrument for ensuring stability, reliability and order in international relations, treaties are one of the most important elements of international peace and security. This is why, from the earliest days in the history of international law, treaties have always been the primary source of legal relations between entities today known as States.¹ The Preamble of the VCLT itself emphasizes the fundamental role of treaties in the history of international relations and especially the importance of treaties for developing peaceful co-operation among nations. This fundamental importance of treaties proved to be a continuum, while the rules and procedures of treaty making, as well as the content of international agreements, changed through the centuries.

The history of international treaties is as long as the history of organized human co-existence. The first treaties known to us are probably those concluded by the rulers of the Hittite empire with their neighbours and vassals in the fourteenth century BC,² followed by Hittite treaties with Ramess II, King of Egypt, around 1280-1270 BC.³ The oldest international treaty preserved in full text is a Friendship and Commerce agreement between the King of Elba and Carthage concluded in the middle of the third century BC,⁴ which was found in the archive of the palace of Elba.

The medieval world had neither States nor a State system in the modern sense of these terms, but due to its numerous sovereigns, a remarkable number of international treaties were concluded. During the early Middle Ages, treaties of a legal nature were not only concluded between more or less independent princes and noblemen, but also between all kinds of authorities of different ranks and legal positions.⁵ Only the church was able to act as a supra-personal, institutional treaty party. A treaty engagement was usually considered to be a personal obligation between the contracting parties, which is why an international treaty was, as a rule, based on the tradition in the law of Roman era, in most cases concluded orally and confirmed as a ceremony by oath.

ЭЛЕКТРОННЫЕ РЕСУРСЫ БИБЛИОТЕКИ НИУ ВШЭ

Количество научных публикаций

6 341 716
публикаций за 2020 год

The screenshot shows the Dimensions AI discovery interface. The search query is "e.g. plastic AND instrument". The interface displays a table of publication counts across various categories:

PUBLICATIONS	DATASETS	GRANTS	PATENTS	CLINICAL TRIALS	POLICY DOCUMENTS
121,312,851	8,940,055	5,907,560	138,979,717	660,016	720,005

The interface also shows a list of publications with filters for publication year, researcher, research categories, and publication type. A line graph on the right side shows the number of citations over time, with a mean citation rate of 11.97. The graph shows a steady increase in citations from 2012 to 2021, with a slight dip in 2021.

A. Railway transport

A.I INFRASTRUCTURE

A.I-01 TRACK

A pair of rails over which rail borne vehicles can run maintained by an infrastructure manager. Metro, Tram and Light rail urban lines are excluded.

In the context of the EU reporting the cumulative length of railway tracks excludes also the following:

- Lines solely used for operating touristic trains and heritage trains;
- Lines constructed solely to serve mines, forests or other industrial or agricultural installations and which are not open to public traffic;
- Private lines closed to public traffic and functionally separated (i.e. stand-alone) networks;
- Private lines used for own freight transport activities or for non-commercial passenger services and light rail tracks occasionally used by heavy rail vehicles for connectivity or transit purposes.

A.I-01.1 MAIN/RUNNING TRACK

A track providing end-to-end line continuity designed for running trains between stations or places indicated in timetables, network statements, rosters or other indications/publications as independent points of departure or arrival for the conveyance of passengers or goods.

A.I-01.2 OTHER TRACKS

All other tracks than main/running ones:

- tracks maintained, but not operated by the infrastructure manager;
- tracks at service facilities not used for running trains, including sidings.

Tracks at service facilities not used for running trains are excluded. The boundary of the service facility is the point at which the railway vehicle leaving the service facility cannot pass without having an authorization to access the mainline or other similar line. This point is usually identified by a signal.

Service facilities are passenger stations, their buildings and other facilities; freight terminals; marshalling yards and train formation facilities, including shunting facilities; storage sidings; maintenance facilities; other technical facilities, including cleaning and washing facilities; maritime and inland port facilities which are linked to rail activities; relief facilities; refuelling facilities and supply of fuel in these facilities.

A.I-02 RAILWAY LINE

Line of transportation made up by rail exclusively for the use of railway vehicles and maintained for running trains.

A line is made up of one or more tracks, according to the definition A.I-01 Track and the corresponding exclusion criteria.

Excluded are:

- Stretches of road or water even if rolling stock is conveyed over such routes, e.g. by wagon-carrying trailers or ferries.

APPLE INC IN CONSUMER ELECTRONICS (WORLD)

February 2019

SCOPE OF THE REPORT

Scope

- Apple (Apple Inc) is one of the most recognisable brands in the world.
- This reports examines the company's business, challenges and key competitors within consumer electronics.

Disclaimer
 Much of the information in this briefing is of a statistical nature and, while every attempt has been made to ensure accuracy and reliability, Euromonitor International cannot be held responsible for omissions or errors.
 Figures in tables and analyses are calculated from unrounded data and may not sum. Analyses found in the briefings may not totally reflect the companies' opinions, reader discretion is advised.

After a stellar financial year with record-breaking results, Apple started the latest quarter with bad news. This reports explores how Apple can transform itself in 2019.

[+] Abstract and Keywords

Adam Smith's formal legacy to posterity consisted of meticulously revised editions of his two published works, and ; long-standing plans for treatises on Jurisprudence, Rhetoric, and the Fine Arts were abandoned on the grounds that there was no time to complete them. This chapter discusses Smith as component parts of an unrealized plan to develop a Science of Man on experimental principles. Smith's introduction to this as a student is explored and the influence of Hutcheson and Hume is emphasized as is the fact that Smith developed both the published and unpublished components of his Science of Man simultaneously. The question of the meaning Smith attached to 'science' is a continuing theme of the chapter.

Keywords: [Adam Smith](#), [Hutcheson](#), [Hume](#), [science of man](#)

Adam Smith is often seen as an unrewarding subject for biography. Dugald Stewart, his first and greatest biographer, saw him as a quiet, unassuming man who led a relatively uneventful life and preferred the peace and quiet of his native Kirkcaldy and the company of old friends to the bustle of Glasgow, Edinburgh, or London. We know him now as a notoriously poor correspondent who valued his privacy, who deplored the current fashion for biographical tittle-tattle and who, at the end of his life, made an archival bonfire of most of his private papers and unfinished texts in an attempt to preserve his biographical privacy. For Smith was a philosopher who believed that a writer should be remembered for his works rather than his life, and for works that were finished, published and polished rather than for those which were incomplete and had yet to reach the public. It was for this reason that he reluctantly abandoned ambitious plans for new treatises on government, philosophy and the fine arts and spent his last years polishing and perfecting the texts of his two great published masterpieces, the *Theory of Moral Sentiments* and *The Wealth of Nations*. As he told his

Contribution/Originality: The study documents the relevance of human capital investment on economic development in Nigeria. The unique contribution lies in the indicators of economic development adopted. An inclusive measure of economic development was used, and the empirical evidence differs from previous studies using GDP per capita as a measure of economic development.

1. INTRODUCTION

The relationship between human capital and economic development goes as far back as the 1930s when Alfred Marshall asserted in his book, Principles of Economics, that investment in people makes human capital the most valuable of all capitals and stimulates economic development. Many other authors have stressed the importance of the relationship between human capital, or investment in human capital, and economic growth, and have formulated various models to explain this theory. The endogenous growth model, which was an improvement on the Harrod-Domar and Solow growth models, explains that investment in human capital, innovation and knowledge would unquestionably contribute to economic growth.

Other researchers such as Oluwatobi and Ogunrinola (2011), Matthew (2011), Akintunde and Satope (2013), Oladeji (2015), and Jaiyeoba (2015) who have also looked at human capital investment or human capital

The characteristics and career influences of male elementary general **music** teachers (Review)

Bulgren, C.W.

Oregon State University, Corvallis, OR, United States

Краткое описание

[Просмотр пристатейных ссылок \(43\)](#)

The purpose of this study was to describe the characteristics of male elementary general **music** teachers and investigate career factors from social cognitive career theory. Items included influential others (teachers, friends, and family), performance accomplishments (career-related activities in coursework, student teaching, general **music** positions, and professional development), and social persuasions (social factors related to teacher preparation programs, colleagues, and school setting). Responses to an online questionnaire from 140 male elementary general **music** teachers were analyzed with three types of statistical analyses: frequencies, independent samples t-tests, and simple linear regression. Results include demographic data and findings related to the interaction of prior experiences, career preparation, and in-service experiences. Other results indicate a wide variety of primary instruments, career trajectories, and original career intentions. Respondents identified those who influenced them, their success in coursework, and their social interactions. Suggestions for the profession include a required elementary general methods course for all preservice **music** teachers and a portion of student teaching in an elementary general **music** setting. Respondents developed teacher identities that allowed them to navigate issues related to elementary general **music** such as career expectations and working in a feminized profession. © 2021 University of Illinois at Urbana-Champaign. Аннотация

The neuroscience of **music** has recently attracted significant attention, but the **effect** of **music** style on the activation of auditory-motor regions has not been explored. The aim of the present study is to analyze the differences in brain activity during passive listening to non-vocal excerpts of four different **music** genres (classical, reggaeton, electronic and folk). A functional magnetic resonance imaging (fMRI) experiment was performed. Twenty-eight participants with no musical training were included in the study. They had to passively listen to **music** excerpts of the above genres during fMRI acquisition. Imaging analysis was performed at the whole-brain-level and in auditory-motor regions of interest (ROIs). Furthermore, the musical competence of each participant was measured and its relationship with brain activity in the studied ROIs was analyzed. The whole brain analysis showed higher brain activity during reggaeton listening than the other **music** genres in auditory-related areas. The ROI-analysis showed that reggaeton led to higher activity not only in auditory related areas, but also in some motor related areas, mainly when it was compared with classical **music**. A positive relationship between the melodic-Music Ear Test (MET) score and brain activity during reggaeton listening was identified in some auditory and motor related areas. The findings revealed that listening to different **music** styles in musically inexperienced subjects elicits different brain activity in auditory and motor related areas. Reggaeton was, among the studied **music** genres, the one that evoked the highest activity in the auditory-motor network. These findings are discussed in connection with acoustic analyses of the musical stimuli. (C) 2021 IBRO. Published by Elsevier Ltd. All rights reserved.

Импакт-фактор научного журнала

ИМПАКТ-ФАКТОР – ЭТО СРЕДНЕЕ ЦИТИРОВАНИЕ ОДНОЙ СТАТЬИ

$$\text{ИФ}_{2020} = \frac{\text{Количество цитирований в 2020 г}}{\text{Количество статей в 2019 и 2018 г}}$$

Пример. В 2020 году в журнале было сделано 80 ссылок на статьи, опубликованных в 2019 году и 140 ссылок на статьи журнала, опубликованные в 2018 году. Итого статьи, вышедшие за 2018-2019 гг получили в 2020 г $80+140=220$ цитирований. При этом в 2019 журнал опубликовал 44 статьи, в 2018 г. — 43. Итого за промежуток 2018-2019 гг (публикационное окно) вышло 87 статей. Таким образом, импакт-фактор журнала за 2020 г. равен отношению $220/87=2,52$

Chapter 1

Conceptual Approaches to Treatment of the Essence of Conflict as an Economic Category

Tatiana N. Litvinova¹

Introduction

Socio-economic systems are unstable and are subject to conflicts due to certain reasons. First, these systems are complex and have many levels. They include a lot of economic subjects, each of which seeks its own interests. The social nature of economic subjects leads to their limited rationality, which complicates forecasting their behavior and managing them. Second, developing according to the market model, modern economic systems aim at intensive growth and are subject to constant changes.

These changes often conform to the interests of certain economic subjects and contradict the interests of others. Third, socio-economic systems are imperfect – despite multiple attempts at their optimization. Ideal models (including the model of market economy) of development of these systems are very difficult to be implemented in practice. This process becomes more complicated due to differentiation of socio-economic systems and complexity of models' adaptation to their peculiarities.

Due to the above reasons, conflicts are a normal phenomenon, which appears in socio-economic systems. However, the modern economic theory does not have a fundamental scientific paradigm of studying conflicts, which hinders their precise determination and does not allow developing a clear and unambiguous attitude toward economic conflicts (universal or differentiated depending on the classification of conflicts, which is also absent) and managing the conflicts depending on the goals and priorities of socio-economic systems.

Abstract

Translate

The purpose of this exploratory, qualitative study was to explore the opinion during the COVID-19 pandemic amidst the Syrian refugee crisis. The main question asked, what were the opinions of Turkish citizens toward the government's communication strategy during the COVID-19 pandemic and citizens opinions toward the government's communication strategy during the COVID-19 pandemic depended on the participants living in metropolitan areas in the Republic of Turkey. The four thematic categories emerged to answer research question. The four categories were: (1) economic status, (2) health broadcasts (vital link, misinformation), (3) government's communication strategy, and (4) short-term and long-term government communications failed to effectively address the needs of citizens. Exploratory research may help Turkey's internal communication policies and strategies.

Chapter 1

Countless voices expressing opinions on the 2020 coronavirus pandemic received significant attention as the flow of capital and goods decreased across the globe (World Health Organization, 2020b). The World Health Organization (2020a) broadcasted the unthinkable theme of 2020 with a new Public Health Emergency of International Concern announcement, released on January 30, 2020, called COVID-19 (also known as the coronavirus) which described an invisible enemy about to wreak havoc throughout the world. Khan and Karataş (2020) claimed that two months later, on March 19, 2020, more than 160 countries reported COVID-19 cases. As of July 2020, there were more than 10 million recorded cases worldwide, and more than 500,000 deaths confirmed spread across at least 216 countries, territories, and other areas (O'Connor & Evans, 2020; Zhou, Bao & Ning, 2020; World Health Organization, 2020b).

The COVID-19 pandemic has brought catastrophic uncertainty on a global scale. As consumers, investors, and international trading partners became more aware, the disease spread exponentially (Alyanak, 2020; Ozili & Arun, 2020). Kenyon (2020) claimed governments use pandemics to expand executive power and restrict individual rights, citizen mobilization, civilian control of militaries, and gain control in the electoral process. As an example, the coronavirus forced governments to quickly change management processes to proactively combat a potential

The screenshot displays the Oxford Academic search interface. On the left, a 'Full Text Finder' sidebar shows search results for 'The Quarterly Journal of Economics' across various databases like Business Source Ultimate, Gale General OneFile, JSTOR, and Oxford Journals Archive. The main search results area shows '1. The Quarterly Journal of Economics' with its ISSN and a search box. Below this, a list of full-text access options is provided, with a red arrow pointing to 'Oxford University Press 02/01/1996 - present'. The right side of the image shows the journal's issue page for Volume 136, Issue 1, February 2021. A red arrow points from the search results to the article 'Health Insurance and Mortality: Experimental Evidence from Taxpayer Outreach' by Jacob Goldin, Ithai Z. Lurie, and Janet McCubbin. The article abstract and full text are visible, along with a red arrow pointing to the article title.

HEALTH INSURANCE AND MORTALITY: EXPERIMENTAL EVIDENCE FROM TAXPAYER OUTREACH*
JACOB GOLDIN
ITHAI Z. LURIE
JANET McCUBBIN
We evaluate a randomized outreach study in which the IRS sent informational letters to 3.9 million households that paid a tax penalty for lacking health insurance coverage under the Affordable Care Act. Drawing on administrative data, we study the effect of this intervention on taxpayers' subsequent health insurance enrollment and mortality. We find the intervention led to increased coverage during the subsequent two years and reduced mortality among middle-aged adults over the same time period. The results provide experimental evidence that health insurance coverage can reduce mortality in the United States. *JEL* Codes: I13, I18, H24.

Abstract: Morning headache is considered to be a symptom of obstructive sleep apnea syndrome (OSAS). Despite not being as common as excessive daytime sleepiness or unrefreshing sleep, it can similarly impair everyday activities. The aim of the present study was to evaluate the prevalence of and factors associated with morning headaches (MH) among patients referred for polysomnography due to suspected OSAS. This is a retrospective study on 1131 patients who underwent polysomnography between 2013 and 2015. Morning headaches (MH) were reported in 29% of them. In a logistic regression model, a rise in the probability of MH was associated with female sex (odds ratio, OR, 1.38, 95% confidence interval, CI, 1.08–1.75), history of hypertension (OR 1.25, 95% CI 1.06–1.46), complaint on unrefreshing sleep (OR 1.42, 95% CI 1.19–1.70), choking at night (OR 1.25, 95% CI 1.05–1.49), and fall in total sleep time (OR 0.872 per each hour, 95% CI 0.76–0.99). The risk between MH and apnea-hypopnea index, blood oxygen saturation parameters or arousal index was found to be statistically insignificant. There is a lack of evidence that MH is associated with the severity of OSAS or nocturnal hypoxemia.

Keywords: OSAS; risk factors of OSAS; morning headaches; BMI

1. Introduction

In obstructive sleep apnea syndrome (OSAS), repeated episodes of obstructive apnea and hypopnea during sleep lead to sleep disruption by arousals. In consequence, patients suffer from excessive daytime sleepiness [1]. Other common OSAS symptoms include loud snoring, waking up with a choking or gasping sensation, sleepiness or lack of energy during the day, and morning headaches (MH). Recurrent arousals increase the risk of hypertension, cardiovascular, and cerebrovascular events [2,3]. The reported prevalence of OSAS ranges from 4% to 84% among men and from 2% to 61% among women [4,5].

MH has been considered to be a symptom of OSAS for more than a century [6,7]. The importance of the link is reflected in the 3rd edition of the International Classification of Headache Disorders since it provides diagnostic criteria for OSAS related headache. By definition, OSAS-related headache is present on awakening after sleep in a patient with diagnosed OSAS based on the apnea-hypopnea

EBSCO DISCOVERY SERVICE: ПОИСК ПО ВСЕЙ ЭЛЕКТРОННОЙ ПОДПИСКЕ

Представлены все англоязычные издания, входящие в подписку НИУ ВШЭ

The image displays a sequence of three screenshots from the EBSCO Discovery Service interface, illustrating the search and access process. A red arrow points from the search results to the detailed record view.

Search Results Screenshot: The search bar contains the text "Enter title, subject or ISSN/ISBN" and a "Search" button. The search results are displayed in a list format. The first result is "2004 Family Law Update" by Aspen Publishers Incorporated, with ISBN 978-0-7355-4219-8. The second result is "A.S. Pratt & Sons: Pratt's Mortgage Compliance Letter" with ISSN 1540-398X. The third result is "The A-Z of employment practice".

Detailed Record Screenshot: The detailed record view for the "2005 Family Law Update" is shown. It includes the EBSCOhost logo, the title "2005 Family Law Update", and the publisher "ASPEN PUBLISHERS". The record is divided into sections: "Full Text Contents" (listing "CHAPTER 1: THE YEAR ...", "CONTENTS.", "ABOUT THE CONTRIBUTORS.", and "2005 Family Law Update.") and "Illustrations".

Full Text Screenshot: The full text view of the "2005 Family Law Update" is displayed. It features the ASPEN PUBLISHERS logo, the title "2005 Family Law Update", and the editors "Ronald L. Brown and Laura W. Morgan, editors". The text describes the update as providing in-depth analysis of family law and practice. It also includes a section titled "Highlights of the 2005 Update" with a list of topics:

- The Year of Same-Sex Marriage: How It Happened
- The Servicemembers Civil Relief Act: A Guide for Family Law Attorneys
