Dear colleagues!

This June we invited you to join and test our new acquisition politics – **DDA or demand-driven acquisition**. DDA ensures that the purchased books were in high demand among our patrons.

EBSCO gave us the full access to their collection of 250,000 eBooks for four months and we picked and purchased only those books that were accessed by the patrons the most and were available only within this collection. In total, we purchased 62 books.

More than half of the purchased books were published within the last six years. The most popular subjects were economics, history, political science and law. Take a look at the top three of the most popular books below!

The Habsburg Empire: A New History

P. M. Judson
electronic book

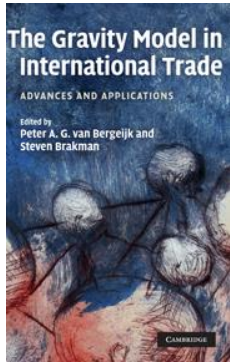

In a panoramic and pioneering reappraisal, Pieter Judson shows why the Habsburg Empire mattered so much, for so long, to millions of Central Europeans. Across divides of language, religion, region, and history, ordinary women and men felt a common attachment to their empire, while bureaucrats, soldiers, politicians, and academics devised inventive solutions to the challenges of governing Europe's second largest state. In the decades before and after its dissolution, some observers belittled the Habsburg Empire as a dysfunctional patchwork of hostile ethnic groups and an anachronistic imperial relic. Judson examines their motives and explains just how wrong these rearward critics were.

The Book of the Twelve: Hosea-Jonah

J. D. Nogalski
electronic book

Over the last thirty years, scholars have begun to explore the implications of an ancient Jewish and Christian tradition that referred to the “Minor Prophets” as “the Twelve,” “the Twelve Prophets,” or the “Book of the Twelve.” Scholarly work on the Book of the Twelve in the last quarter century has focused on two issues: (1) examining how the Book of the Twelve came to be recorded on a single scroll and (2) isolating unifying elements that transcend the individual writings and take on new significance when the Book of the Twelve becomes a single collection. Nogalski’s comprehensive commentary offers an overview of the ancient traditions concerning the Book of the Twelve that lays the foundation for understanding these recent developments. Written by accomplished scholars with all students of Scripture in mind, this innovative new commentary series is designed to make quality Bible study more accessible.

The Gravity Model in International Trade: Advances and Applications

P. A. G. van Bergeijk, S. Brakman

electronic book

How do borders affect trade? Are cultural and institutional differences important for trade? Is environmental policy relevant to trade? How does one's income or wage relate to the fact that trade partners are nearby or far away? These are just some of the important questions that can be answered using the gravity model of international trade. This model predicts and explains bilateral trade flows in terms of the economic size and distance between trading partners (e.g. states, regions, countries, trading blocs). In recent years, there has been a surge of interest in this model and it is now one of the most widely applied tools in applied international economics. This book traces the history of the gravity model and takes stock of recent methodological and theoretical advances, including new approximations for multilateral trade resistance, insightful analyses of the measurement of economic distance and analyses of foreign direct investment.

Китай 2020: пандемия, общество и глобальные альтернативы

А. А. Маслов

2021

печатная книга

Что происходит с социальной ситуацией и экономикой Китая в 2020 г. и насколько она устойчива под ударами эпидемии? В чем реальная суть противостояния США и КНР, почему оно столь резко обострилось именно в период пандемии и как поведет себя Европа на этом фоне? Как и почему Китаю удалось в столь короткие сроки почти одолеть эпидемию и насколько был откровенен Пекин в своей информации по поводу масштабов заболевания? Эта книга, состоящая из серии очерков и отдельных статей, создавалась в тот момент, когда пандемия даже не вступила в стадию своего завершения. Мы обсудим то, как развивалась ситуация в Китае, какие меры предпринимал Китай для стабилизации собственной экономики и на каком международном фоне это происходило.

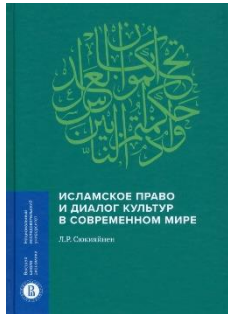

The Ever-Changing Past: Why All History is Revisionist History

J. M. Banner Jr.

2021

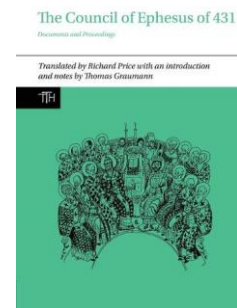

printed book

History is not, and has never been, inert, certain, merely factual, and beyond reinterpretation. Taking readers from Thucydides to the origin of the French Revolution to the Civil War and beyond, James M. Banner, Jr. explores what historians do and why they do it. Banner shows why historical knowledge is unlikely ever to be unchanging, why history as a branch of knowledge is always a search for meaning and a constant source of argument, and why history is so essential to individuals' awareness of their location in the world and to every group and nation's sense of identity and destiny. He explains why all historians are revisionists while they seek to more fully understand the past, and how they always bring their distinct minds, dispositions, perspectives, and purposes to bear on the subjects they study.

The Council of Ephesus of 431: Documents and Proceedings
R. Price, T. Graumann
2020
printed book

The First Council of Ephesus (431) was the climax of the so-called Nestorian Controversy. Convoled by the emperor Theodosius II to restore peace to the Church, it immediately divided into two rival councils, both meeting at Ephesus. Attempts by the emperor's representatives to get the bishops on both sides to meet together had no success, and after four months the council was dissolved without having ever properly met. But a number of decrees by the larger of the two rival councils, in particular the condemnation of Nestorius of Constantinople, were subsequently accepted as the valid decrees of the 'ecumenical council of Ephesus'. The documentation, consisting of conciliar proceedings, letters and other documents, provides information not only about events in Ephesus itself, but also about lobbying and public demonstrations in Constantinople.

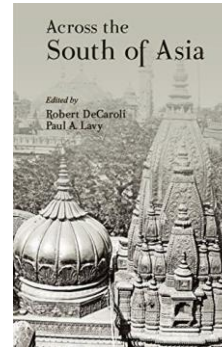

Фейки: коммуникация, смыслы и ответственность

Г. Л. Тульчинский, С. Т. Золян,
Ж. Р. Сладкевич, Н. А. Пробст
2021

печатная книга

В коллективной монографии предпринята попытка междисциплинарного анализа коммуникативно-цивилизационной природы феномена фейков и постправды, включая оценочно-эмоциональные факторы в формировании и динамике смысловой картины мира, с учетом современных медийных технологий. Детально рассмотрены семантика и прагматика фейков, их зависимость от целевых контекстов, социально-культурных практик, порождение и применение фейков в сетевой коммуникации, конфликтах исторической памяти и информационных войнах. Специальное внимание уделяется персонологическому измерению фейков, дисбалансу между правами, свободой и ответственностью в публичной коммуникации. Тем самым акцент в осмыслении фейков переносится с оценки истинности на отношение к

Across the South of Asia: A Volume in Honor of Professor Robert L. Brown

R. DeCaroli, P.A. Lavy
2020

printed book

This collection of essays invites readers to take a broad view of South Asian art and culture by providing a wide geographic and chronological scope. The articles are united only by their focus on art historical and archaeological concerns and their concentration on South Asia ranging from Afghanistan to the island kingdoms of Indonesia. Each essay on its own constitutes a solid, well-grounded academic study, but taken collectively they provide a wide and inclusive view of issues of art and material culture that span the region and invite comparison. By taking this approach, this volume is a tribute to Prof. Robert L. Brown whose lifetime of teaching has always emphasized connections as well as differences. Over his professional career, he has trained a large cohort of students (many of whom are contributors to this volume) whose expertise truly does reach across the south of Asia.

Бозон Хиггса, квантовые струны и философия физики

И.Е. Прись

2021

печатная книга

Книга состоит из четырех частей. В первой части дается общее представление о бозоне Хиггса и механизме спонтанного нарушения симметрии. Во второй части рассматривается вопрос онтологии теорий струн, связанных между собой преобразованиями дуальности. В третьей части показано, каким образом конструктивный эмпирицизм Бас ван Фраассена может быть преобразован в контекстуальный (критический) научный реализм – позицию, отстаиваемую на протяжении всей книги. В четвертой части устраняются проблемы, с которыми сталкиваются репрезентационализм, реляционизм, перспективизм и феноменологический подход в определении понятия научных данных.

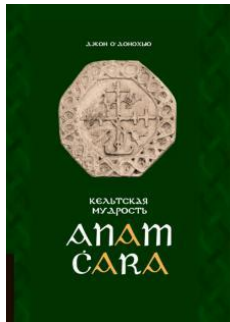

La politica dell'evidenza nel Trecento fiorentino: pittura e immaginario pubblico

K. Krueger

2020

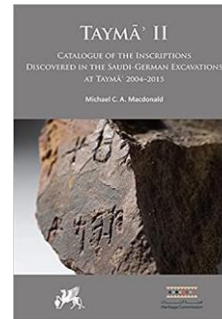

printed book

Nel corso del Trecento, le immagini diventano sempre più parte integrante del discorso politico e dell'azione pubblica, con una capacità di impatto visivo senza precedenti. Sulle facciate delle piazze urbane, in palazzi comunali, in chiese o conventi, in edifici di arti e confraternite, le pitture acquisiscono un potere enorme, "interagendo" con riunioni, rituali o cerimonie e raffigurando una realtà in cui i vari gruppi sociali potevano riconoscersi. Un fenomeno tanto complesso solleva questioni di vasta portata. In che modo le immagini raffigurarono argomenti politici teorici e astratti, questioni di giurisdizione, affari di governo, restando al contempo fedeli al nuovo paradigma "realistico" di Giotto? E quale importanza ebbe il postulato della "bellezza" e del valore estetico, sempre più richiesto dall'élite di committenti ricchi e politicamente potenti? In questo saggio sull'efficacia

Д. О'Донохью
2021
печатная книга

Ирландский поэт, философ, священник Джон О'Донохью – носитель, а не исследователь кельтской культуры, – подобно «другу души», *anam cara*, знает о нас и об окружающем нас мире больше, чем мы сами. Перемежая прозу и поэзию, он «переоткрывает» ставшую невидимой сегодня жизнь, далекую от спешки, автоматизма, штампов и уничтожения «себя настоящего». Дружба, любовь, душевность, умение смотреть и видеть, слушать и слышать, воспринимать каждое утро как дар и радость открытия, становиться мудрым и не бояться, – вот всего лишь несколько МОТИВОВ КНИГИ.
