

#IN_CIRCULATION

Dear colleagues!

In this issue, we would like to inform you about our current trials for electronic resources, show you new exciting additions to our printed collection and tell about past events our staff organized or took part in. Scroll to learn more!

New in Electronic Resources

Until **November 16, 2023**, we have access to the following **medicine publications**:

- approximately 80 journals published by Lippincott Williams & Wilkins (Wolters Kluwer imprint) on [Ovid](#) platform. Features such journals as *Hypertension*, *Circulation Research*, *American Journal of Surgical Pathology*, *Medicine & Science in Sports & Exercise* and others;

- one of the most famous and cited journals – [New England Journal of Medicine \(NEJM\)](#) and newer journals from the same publishing group: [NEJM Journal Watch](#), [NEJM Catalyst Innovations in Care Delivery](#) and [NEJM Evidence](#);
- approximately [30 journals](#) and [200 books](#) published by Future Medicine. Publications on medicine, biology, neuroscience, genetics, including the peer-reviewed [Nanomedicine](#), [Epigenomics](#), [Immunotherapy](#) and others.

Until **November 24, 2023**, [CAS SciFinder](#) is available. It's the biggest abstracts database on chemistry featuring bibliographic information from several thousand journals, books, patents, and dissertations. You can conduct classical bibliographic search as well as search chemical compounds, Markush structures and chemical reactions through the special visual tool for drawing molecules, structures and reactions.

Until **November 30, 2023**, [GeoScience World](#) trial is running. Features collection of more than 50 journals on Earth sciences published by leading scientific communities, including London Geological Society, The Geological Society of America, Seismological Society of America, American, Canadian and British mineralogical societies, and Society of Economic Geologists. The most famous publications are [Geology](#), [GSA Bulletin](#), [Reviews in Mineralogy and Geochemistry](#) and others. The trial also features [GeoRef](#), abstracts database on Earth sciences.

Learn more about these resources in our [trials](#) section. [Get](#) remote access if you still haven't – check the Library section on HSE App X to make sure!

We hope you will find this information useful!

New in Printed Collection

Вдалеке: от контркультурных исканий к индустрии путешествий в Непале

М. Лехти

2022

печатная книга

Американский антрополог и социокulturолог Марк Лехти рассматривает культурное взаимодействие Востока и Запада сквозь призму развития туристической индустрии в Непале – стране, которая оставалась «закрытой» до середины XX века. В книге рассказывается о том, каким Непал виделся представителям западной контркультуры, какие формы принимали меняющиеся контркультурные проекции и как сами жители Непала реагировали на их «открытие» многочисленными иностранцами.

The Routledge Social Science Handbook of AI

edited by A. Elliott

2022

printed book

The book is a landmark volume providing students and teachers with a comprehensive and accessible guide to the major topics and trends of research in the social sciences of artificial intelligence (AI), as well as surveying how the digital revolution – from supercomputers and social media to advanced automation and robotics – is transforming society, culture, politics and economy. It provides representative coverage of the full range of social science engagements with the AI revolution, from employment and jobs to education and new digital skills to automated technologies of military warfare and the future of ethics.

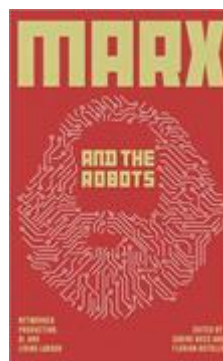

Я понял Японию: от драконов до покемонов

А. Е. Раевский

2023

печатная книга

Япония, без сомнения, одна из самых загадочных и удивительных стран на Земле, подарившая миру столько самобытных культурных феноменов, что и не сосчитать. Географически будучи Востоком, а ментально тяготея к Западу, она зависла где-то посередине и способна удивить любого иностранца. Эта книга для тех, кто чувствует очарование Японии, заинтригован и хотел бы узнать о ней больше. Здесь объединены академические знания об истории и культуре страны, а также личный опыт автора. Серьёзность содержания сочетается с увлекательным языком повествования и лёгкостью изложения.

Marx and the Robots: Networked Production, AI and Human Labour

edited by F. Butollo, S. Nuss

2022

printed book

Marxist discourse around automation has recently become waylaid with breathless techno-pessimist dystopias and fanciful imaginations of automated luxury communism. This collection of essays by both established veterans of the field and new voices is a refreshingly sober materialist reflection on recent technological developments within capitalist production. It covers a broad range of digital aspects now proliferating across our work and lives, including chapters on the digitalisation of agriculture, robotics in the factory and the labour process on crowdworking platforms.

Эфемерный музей: картины старых мастеров и становление художественной выставки

Ф. Хаскелл

2022

печатная книга

Книга посвящена истории временных выставок, на которых демонстрировались работы мастеров прошлого. Автор прослеживает это явление от его зарождения в Италии в XVII столетии до расцвета в Германии, Нидерландах и Великобритании в XX веке. Он показывает, что временные выставки не только способствовали пониманию изобразительного искусства, но неизбежно служили и другим целям: религиозным, общественным, политическим. Хаскелл задается вопросом, нужны ли такие выставки, и обращает внимание читателей на опасности, которые несет в себе «эфемерный музей».

Marx in the Anthropocene: Towards the Idea of Degrowth Communism

K. Saito

2022

printed book

Facing global climate crisis, Karl Marx's ecological critique of capitalism more clearly demonstrates its importance than ever. This book explains why Marx's ecology had to be marginalized and even suppressed by Marxists after his death throughout the twentieth century. Marx's ecological critique of capitalism, however, revives in the Anthropocene against dominant productivism and monism. Investigating new materials published in the complete works of Marx and Engels (Marx-Engels-Gesamtausgabe), Saito offers a wholly novel idea of Marx's alternative to capitalism that should be adequately characterized as degrowth communism.

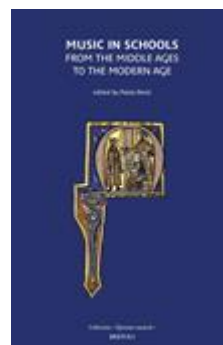

Merцающие миры Александра Введенского

К. Ичин

2023

печатная книга

В книгу, посвященную творчеству Александра Введенского (1904–1941), вошли работы разных лет, которые сложились в монографию о русском поэте – радикальном экспериментаторе, члене Объединения реального искусства (ОБЭРИУ), плодовитом детском писателе, в чьих неопубликованных при жизни «взрослых» произведениях был осуществлен подрыв обыденного языка и обыденного сознания. Книга составлена из 15 глав, затрагивающих ряд глубоко волнующих поэта вопросов, которые сохранились в его уцелевших текстах (до нас дошла, как предполагается, лишь четверть написанного Введенским).

Music in Schools from the Middle Ages to the Modern Age

edited by P. Dessì

2021

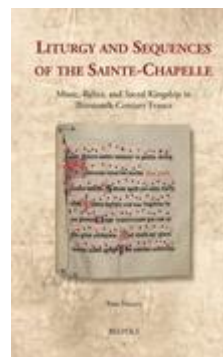

printed book

The contributors to this project – musicologists, historians, philosophers, art historians, and historians of philosophy – have been invited to participate in a multidisciplinary dialogue with respect to the position music has occupied in instructional and educational systems from medieval to modern times. Their essays are indicative of diverse disciplinary perspectives towards the subject and feature an array of innovative interpretations. On the whole, they neither claim the supremacy of music in the context of the various educational systems, nor do they focus on the artistic musical production that emerged as a consequence of the various educational approaches.

Трактат о каллиграфах и художниках
Кази Ахмад б. Хусайн ал-Хусайни
Куми
2023
печатная книга

Настоящее издание представляет собой публикацию критического текста первой редакции «Трактата о каллиграфах и художниках» Кази Ахмада б. Хусайна ал-Хусайни Куми, составленного на базе трёх сохранившихся до настоящего времени списков этого сочинения. Критический текст сопровождается переводом на русский язык. Перевод снабжён фундаментальным комментарием. Данная работа впервые даёт в руки исследователям научный текст первой редакции труда Кази Ахмада.

Liturgy and Sequences of the Sainte-Chapelle: Music, Relics, and Sacral Kingship in Thirteenth-Century France
Y. Maurey
2021
printed book

The book revolves around some of the most important relics of Christendom – chief among them the Crown of Thorns – and the ways in which they became, effectively, personal objects of devotion, notwithstanding their ostensibly universal appeal. It was France that laid claim to the Passion and other relics in the middle of the thirteenth century in a campaign that involved the construction of a new magnificent chapel – the Sainte-Chapelle – designed specifically to display the relics, and the composition of new liturgies to celebrate and focus attention on them. As inert objects, relics could not accomplish much without being 'activated' one way or the other, whether in prose, poetry, paintings, statues, or in music.

News

On October 11, we organized a workshop for first-year HSE University students and Lyceum students in the library at Pokrovsky boulevard. They learned about HSE Library resources and later joined the quest to master the information search through various mediums available in the Library.

On October 12, HSE Library managers Anna Tokhova and Ekaterina Ustyugova joined the research festival held in HSE Lyceum. They presented HSE Library services and research opportunities highlighting the electronic resources, search tools and scientific analysis.

See you in our reading halls!
